

DILIPKUMAR NEHRU

Full-Stack Software Engineer • Node.js, React/Next.js & API Platform Specialist

Bengaluru, India | dilipkumarnehru75@gmail.com | +91 78456 06064 | linkedin.com/in/dilipkumar-nehru-801050265 | github.com/DilipkumarNehru

PROFESSIONAL SUMMARY

Software Engineer with 3.6+ years building scalable web applications and REST APIs across the full stack — Node.js, Express.js and NestJS on the backend; React and Next.js on the frontend. Delivered production systems handling 50,000+ daily requests for enterprise CRM and AI analytics platforms, with hands-on experience across SQL and NoSQL databases (MongoDB, MySQL, PostgreSQL), asynchronous processing (RabbitMQ), Git-based version control, and TypeScript. Comfortable working independently in fast-moving, remote-friendly teams, writing clean and testable code, and using modern AI-assisted coding tools (GitHub Copilot, ChatGPT) to move quickly without cutting corners.

CAREER HIGHLIGHTS

- ▶ Handled 50,000+ daily API requests in production across Node.js/Express services (NovoNordisk CRM, UrbanPiper CRM)
- ▶ Reduced API latency by 35% through MongoDB indexing and query optimisation
- ▶ Cut asynchronous job completion time from 8s to under 2s by redesigning a RabbitMQ-based processing pipeline
- ▶ Delivered full-stack features end-to-end using Node.js/NestJS, MongoDB, React and Next.js with Tailwind CSS

WORK EXPERIENCE

Backend Engineer – Software Developer | Triotech Bizserve Private Limited — Bhopal

Jun 2026 – Sep 2026

- ▶ Built backend services for Ringingo, a multi-tenant cloud telephony SaaS platform, including real-time CDR processing, webhook delivery and third-party API integrations
- ▶ Designed a RabbitMQ-driven real-time data pipeline with timezone-aware scheduled webhooks, cursor-based incremental delivery, and retry/delivery-log mechanisms
- ▶ Implemented Token-to-API Key management with JWT authentication (x-api-key and Bearer token flows), including key refresh and expiry handling
- ▶ Delivered features end-to-end across NestJS/Node.js, MongoDB, microservices, and React/Next.js with Tailwind CSS for secure, scalable multi-tenant applications

Software Engineer – Backend Developer | Zuqo Corporation India Pvt Ltd — Bengaluru

Dec 2023 – May 2025

- ▶ Designed and maintained RESTful APIs using Node.js and Express.js, serving 50,000+ daily requests with 99.5% uptime
- ▶ Reduced MongoDB query response times by 35% through indexing, query optimisation and connection pooling
- ▶ Implemented asynchronous background processing with RabbitMQ, cutting job completion time from 8s to under 2s
- ▶ Integrated MongoDB and MySQL with backend microservices, standardising schema design and reducing data inconsistencies by 60%
- ▶ Implemented JWT authentication and OAuth 2.0 authorisation flows across multiple APIs, enabling secure third-party integrations
- ▶ Integrated Socket.io for real-time WebSocket notifications and live dashboard updates, cutting client-side polling by 80%
- ▶ Collaborated in a 6-member cross-functional Agile team on 2-week sprints with zero critical production rollbacks
- ▶ Debugged 30+ production incidents, reducing Mean Time to Resolution (MTTR) by ~45%

Software Test Engineer – QA Automation | Zuqo Corporation India Pvt Ltd — Bengaluru

Apr 2022 – Dec 2023

- ▶ Built and maintained a Selenium automation suite covering 200+ functional and regression test cases, cutting manual effort by 40%
- ▶ Performed API testing and backend validation using Postman and JMeter, catching 80+ defects pre-production
- ▶ Created bug reports, test plans and troubleshooting runbooks adopted as the team's QA documentation standard

PROJECT HIGHLIGHTS

- ▶ NovoNordisk CRM — Architected Node.js/Express/MongoDB APIs for a global pharmaceutical CRM (50,000+ daily requests); implemented JWT, OAuth 2.0, field-level encryption and RBAC for secure data handling
- ▶ UrbanPiper AI Analytics — Built event-driven microservices with RabbitMQ and Socket.io streaming real-time analytics to 100+ restaurant dashboards, with REST APIs delivering sub-500ms response times

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Node.js, SQL, Python, Java
Frontend	React.js, Next.js, Tailwind CSS
Backend	Express.js, NestJS, REST APIs, Microservices, WebSockets, Socket.io
Databases	MongoDB, MySQL, PostgreSQL (SQL & NoSQL)
Messaging	RabbitMQ, Event-Driven Architecture, CDR Processing
Auth & Security	JWT, OAuth 2.0, bcrypt, HTTPS/TLS
AI-Assisted Dev	GitHub Copilot, Cursor, ChatGPT (AI pair-programming workflow)
Testing	Postman, Selenium WebDriver, JMeter, API Automation
Tools	Git, GitHub, Bitbucket, Linux CLI, Agile/CI-CD awareness

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering (ECE)

RVS Technical Campus, Coimbatore (Anna University) — 2020

Diploma – Electronics & Communication Engineering (ECE)

Krishnasamy Memorial Polytechnic College, Cuddalore — 2012 – 2015

CERTIFICATIONS

- ▶ Selenium Automation & Manual Testing — QSpiders, Bangalore (2022)
- ▶ MongoDB Basics (M001) — MongoDB University [in progress / recommended next]
- ▶ Node.js Application Developer — OpenJS Foundation [in progress / recommended next]
