

DILIPKUMAR NEHRU

Node.js Engineer — Backend & Full-Stack (Node.js | RESTful APIs | PostgreSQL | React)

Bengaluru, India | dilipkumarnehru75@gmail.com | +91 78456 06064 | linkedin.com/in/dilipkumar-nehru-801050265 | github.com/DilipkumarNehru

PROFESSIONAL SUMMARY

Backend Engineer with 3+ years of software development experience building RESTful APIs and object-oriented backend systems using Node.js, Express.js, and NestJS. Strong grounding in relational and NoSQL database design (PostgreSQL, MySQL, MongoDB), with hands-on front-end experience in React.js and Next.js and general familiarity with modern front-end frameworks. Delivered production services handling 50,000+ daily requests at 99.5% uptime for enterprise CRM and analytics platforms. Comfortable working across the stack, collaborating in Agile teams, and picking up new cloud and infrastructure tooling quickly.

CAREER HIGHLIGHTS

- 3+ years building RESTful, object-oriented backend services with Node.js and Express.js/NestJS
- Hands-on relational database experience (PostgreSQL, MySQL) plus MongoDB schema design and indexing
- Front-end delivery experience with React.js and Next.js, working directly with backend APIs
- 50,000+ daily API requests served with 99.5% uptime across enterprise CRM and analytics platforms

WORK EXPERIENCE

Backend Engineer – Software Developer | Triotech Bizserve Private Limited

Jun 2026 – Sep 2026

Ringingo — multi-tenant cloud telephony SaaS platform

- Developed and enhanced backend services for a multi-tenant SaaS platform, building RESTful APIs for real-time CDR processing, webhook delivery, and third-party integrations.
- Applied object-oriented design principles in NestJS to structure modular, maintainable services across the platform.
- Built API-key and JWT-based authentication (x-api-key and Bearer token support) with key refresh and expiry handling.
- Delivered end-to-end features across NestJS/Node.js, MongoDB, microservices, and React/Next.js for a multi-tenant, scalable SaaS environment.

Software Engineer – Backend Developer | Zuqo Corporation India Pvt Ltd

Dec 2023 – May 2025

- Designed and maintained scalable RESTful APIs using Node.js and Express.js, applying OOP and clean-architecture principles, serving 50,000+ daily requests with 99.5% uptime.
- Integrated MongoDB and MySQL databases with backend microservices, standardising schema design patterns that reduced inter-service data inconsistencies by 60%.
- Reduced database query response times by 35% through strategic indexing, query optimisation, and connection pooling.
- Implemented JWT-based authentication and OAuth 2.0 authorisation flows across multiple APIs, enabling secure third-party integrations.
- Built React.js front-end components consuming internal REST APIs for real-time analytics dashboards, integrating Socket.io for live updates.
- Collaborated with a 6-member cross-functional team in 2-week Agile sprints, consistently delivering features on schedule with zero critical production rollbacks.
- Debugged and resolved 30+ production incidents, reducing Mean Time to Resolution (MTTR) by ~45%.

Software Test Engineer – QA Automation | Zuqo Corporation India Pvt Ltd

Apr 2022 – Dec 2023

- Built and maintained a Selenium automation suite covering 200+ functional and regression test cases, cutting manual testing effort by 40%.
 - Performed API testing and backend validation using Postman and JMeter, identifying 80+ defects prior to production deployment.
 - Created structured bug reports, test plans, and troubleshooting runbooks adopted as the team's QA documentation standard.
-

PROJECT HIGHLIGHTS

NovoNordisk CRM — Healthcare Enterprise Platform

- Architected scalable RESTful backend APIs (Node.js, Express.js, MongoDB) handling 50,000+ daily requests for a global pharmaceutical CRM.
- Implemented JWT authentication, OAuth 2.0, field-level encryption, and RBAC for secure handling of sensitive patient and sales data.
- Optimised 15 high-frequency MongoDB aggregation queries, reducing dashboard load times by 35% for 500+ concurrent users.

UrbanPiper AI Analytics — F&B Analytics Dashboard

- Built event-driven backend microservices with RabbitMQ and Socket.io, exposing REST APIs consumed by React front-end dashboards.
- Delivered REST APIs with sub-500ms response times, enabling real-time KPI monitoring for 100+ restaurant clients.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, Java, Python

Backend & OOP: Node.js, Express.js, NestJS, RESTful API design, Object-Oriented Programming

Databases: PostgreSQL, MySQL, MongoDB (schema design, indexing, aggregation), Mongoose

Front-end: React.js, Next.js, Tailwind CSS (general familiarity with component-based frameworks such as Vue and Angular)

Messaging & Async: RabbitMQ, event-driven architecture, WebSockets (Socket.io), webhook/retry mechanisms

Auth & Security: JWT, OAuth 2.0, role-based access control (RBAC), bcrypt, HTTPS/TLS

Testing: Postman, Selenium WebDriver, JMeter, API automation, unit & integration testing practices

DevOps / Tools: Git, GitHub, Bitbucket, Linux CLI, Agile methodology, CI/CD awareness

CERTIFICATIONS

- Selenium Automation & Manual Testing — QSpiders, Bangalore (2022)
- MongoDB Basics (M001) — MongoDB University (in progress)
- Node.js Application Developer — OpenJS Foundation (in progress)

EDUCATION

Bachelor of Engineering – Electronics & Communication Engineering

RVS Technical Campus, Coimbatore (Anna University) — 2020

Diploma – Electronics & Communication Engineering

Krishnasamy Memorial Polytechnic College, Cuddalore — 2012 – 2015
